**Subject:** PLP Port Site

Rick et al.,  
During our Kenai River Center coordination meeting this morning Dave Casey from the Kenai Field Office of the Corps reported that they had been contacted by PLP about geotechnical work for their port facility. They propose a drilling program to evaluate the suitability of materials as basement materials to support their port facility and, I assume, access roads. The Corps told them that they will schedule a 404 pre-app meeting when their vision of the work is sufficiently complete. That pre-app meeting will likely be some time in April.

This is a substantial investment in the preliminary work for development of the facility. It suggests to me that they expect to move forward.

Phil
